

SAFETY TRAINING & SERVICES

WE ARE YOUR SAFETY PARTNER

WHITE CAP®

WORKING AT HEIGHTS TRAINING

Designed for workers in the construction industry who must complete the required training outlined in various provinces. Our program is approved to be instructed in various provinces and meets the requirements of the Working at Height training standards. Gain the knowledge to safely perform duties while working at heights.

INSPECTION COURSE

This service provides turnkey solutions for the inspection of personal fall protection equipment, including data logging each item type at your predetermined site. We offer services to support customers using fall protection equipment by providing annual detailed inspections as mandated by the manufacturer. Some examples are harnesses, lanyards, anchor connectors and Type 1 SRD (Self Retracting Devices).

FIT TEST TRAINING WORKSHOP AS PER CSA Z94.4-18

Designed for anyone interested in conducting CSA required training for care and use of respirators according to Z94.4-18. It also teaches protocol for Qualitative Fit Testing workers in various types of respirators using irritant smoke, Bitrex, or saccharin.

**ALSO AVAILABLE: FIT TEST WORKERS SERVICE
AS PER CSA Z94.4-18**

SAFETY TRAINING & SERVICES

ASSET INSPECTION & TRACKING SOFTWARE *REDUCING INCIDENTS & SIMPLIFYING SAFETY*

NEW FOR 2023!

EQUIPMENT TAGGING & LOGGING SERVICE

We offer a service that tags and electronically logs your fall protection equipment. This provides a layer of smart asset management to track its certification and product information in a dashboard, available at your fingertips.

3M™ E-A-RFIT™ DUAL-EAR VALIDATION SYSTEM

This system helps employers verify whether the hearing conservation product that a worker is using is providing adequate protection.

- Dual-ear testing
- Fast and clear accurate results
- Earmuff testing capability
- Testing of all 7 frequencies
- Seamless software integration
- Science-based, quantitative testing
- Compact design
